18 NOV 1963

25X1C

Much has happened since your letter of 19 August (your ref G-219) as you are no doubt aware. These changes have resulted in my assuming greater responsibilities, as a result of which I have been somewhat tardy in attending to my correspondence.

You will be much interested, I am sure, in the changes in OSI which were occasioned by my having moved up to assume the new position of Deputy Director for Science and Technology on 5 August of this year. I appointed Don Chamberlain, the Chief of ABCD/SI, as my Assistant Director for Scientific Intelligence on 3 September. You will be happy to know that Don and I are in complete agreement on the mutual benefit to be realized from continued cooperation between his office and yours. In this connection, he has mentioned to me his intent to drop you a note in the near future.

The problem of chairmanship for the Guided Missile and Astronautics Intelligence Committee has also been solved very successfully. The Director has appointed Mr. Carl Duckett, formerly Director of Intelligence at the U.S. Army Ballistic Missile Agency in Huntsville, Alabama, to be my replacement as Chairman of GMAIC. Carl is an old friend of mine whom you may remember from some of the [redacted] meetings. In addition to his duties as GMAIC chairman, Carl has temporarily been assigned to OSI as of 30 September.
